BLUETOOTH® HANDS FREE SPEAKER PHONE USER GUIDE

Before You Start
Please read and understand all the instructions in this User Guide before using the Bluetooth Hands Free Speaker Phone while operating a motor vehicle. When using the speaker phone with your cell phone or other devices, read and follow all instructions and safety guidelines provided by the manufacturers of the other devices. Do not pair the speaker phone with incompatible devices.

WARNING: NEVER CHARGE THE SPEAKER PHONE WHILE IT IS MOUNTED ON THE STEERING WHEEL. SEE CHARGING INSTRUCTIONS, BELOW.

Features & Specifications

Features:
• Answer and End a Call
• Reject a Call
• Voice Dial (if supported by the model of your phone)
• Last Number Redial
• Built-In Speaker
• Built-In Microphone
• Incoming Call Number and Name Display
• “+ “ and “- “ to scroll phone numbers
• Stores up to 600 telephone numbers
• Stores the last 10 incoming call numbers can call them back
• Call Switching between cell phone and speaker phone
• DSP Technology
• Full Duplex/Noise & Echo Suppression

Specifications:
• Bluetooth® Version: 2.0
• Bluetooth profile supported: headset and hands free profile
• Frequency Range: 2.4GHz Spectrum
• Charger Input Voltage: DC12V-24V
• Dimensions: 33 inches (L) x 1.9 inches (W) x 1 inches (H)
• Weight: 2.36 oz
• Operating temperature: 32°F -122°F (0°C - 50°C)
• Storage temperature: 14°F -140°F (-10°C - 60°C)

Requires a Bluetooth® Version 2.0 compatible cell phone and phone service, which you must acquire separately.

Installation

A
B

Note: Your speaker phone is designed to attach to the top of your steering wheel, as shown above in row A. However, if you prefer, you may use the included magnet to mount the speaker phone on your dash board as shown in row B.

Charging the Bluetooth Speaker Phone

The Bluetooth hands free speaker phone is powered by a rechargeable Li-Ion battery. The speaker phone will beep when the battery is running low, and “Low Bat” on the LCD will confirm it. Please charge it with the enclosed charger.

1. BEFORE YOU START CHARGING, REMOVE THE SPEAKER PHONE FROM THE STEERING WHEEL. NEVER ALLOW THE CHARGING CORD TO HANG NEAR THE STEERING WHEEL, GEAR SHIFT OR FOOT CONTROL WHILE THE CAR IS MOVING.
2. Plug the charger cord into the DC port of your passenger phone
3. Plug the USB end of the charger cord into the adapter and plug the adapter into the 12V cigarette lighter. Alternatively, you can charge the battery by plugging it into a USB port of your computer.
4. Red LED on means the battery is charging
5. Red LED off means the battery is charged. When the red light is turned off, the speaker phone will not drain power from your car battery or computer.
6. Always disconnect the charging cord from the speaker phone before reattaching the speaker phone to the steering wheel.
7. Take care to prevent the charging cord from wrapping around the gear shifter, brake pedal or accelerator while you are charging the battery.

NEVER OPERATE YOUR VEHICLE WITH THE CHARGING CORD PLUGGED INTO YOUR STEERING WHEEL SPEAKER PHONE WHILE THE SPEAKER PHONE IS ATTACHED TO THE STEERING WHEEL. IF YOU ATTEMPT TO OPERATE THE VEHICLE WHILE YOU ARE CHARGING A SPEAKER PHONE THAT IS MOUNTED ON THE STEERING WHEEL, THE CHARGING CORD COULD BECOME STUCK AROUND THE STEERING WHEEL AND PREVENT NORMAL STEERING.

Operation

Getting Started

Your Bluetooth speaker phone is equipped with the buttons shown above, in the “Controls” illustration:

ON/OFF SWITCH: Turn on the device to make or answer a call. The screen will light up and show “BLUETOOTH”, and you will hear a start-up tone beep; Turn the device off to conserve battery power when not in use.

“+” This button can scroll the last 10 incoming call numbers.

“-” This button can scroll numbers in the speaker phone’s phone book.

“+” This button performs the following functions: answer a call, reject a call, end a call, voice dial, redial the last number, and answer call waiting. (See specific descriptions below for performing each task)

MICROPHONE: The Bluetooth speaker phone is equipped with a full duplex system microphone, DSP technology, and a noise and echo suppression system.

LCD DISPLAY SCREEN: The screen displays up to 12 digits Caller ID (Ds, caller name if you have downloaded your cell phone’s address list to the speaker phone), and device status messages.

Requirements:
• Bluetooth® Version 2.0
• Bluetooth profile supported: headset and hands free profile
• Frequency Range: 2.4GHz Spectrum
• Charger Input Voltage: DC12V-24V
• Dimensions: 33 inches (L) x 1.9 inches (W) x 1 inches (H)
• Weight: 2.36 oz
• Operating temperature: 32°F -122°F (0°C - 50°C)
• Storage temperature: 14°F -140°F (-10°C - 60°C)

Note: Your speaker phone is designed to attach to the top of your steering wheel, as shown above in row A. However, if you prefer, you may use the included magnet to mount the speaker phone on your dash board as shown in row B.

**Pairing Your Bluetooth Speaker Phone With Your Cell Phone**

Prior to using your Bluetooth speaker phone for the first time, you must pair it with a Bluetooth enabled cell phone. The Bluetooth connectivity pairing procedure varies from one cell phone model to another. Please refer to your cell phone’s User Guide instruction for Bluetooth pairing if the following instructions do not work.

1. Turn on the Bluetooth speaker phone and your cell phone. Activate your cell phone’s Bluetooth function to search for new Bluetooth devices. (Refer to your cell phone’s User Guide for instructions on how to turn on Bluetooth.)
   1. Select “Search” from the list of available devices on your cell phone.
   2. Enter “0000” as the code on your speaker phone to confirm the pairing process.
   3. Pairing is now complete. Your Bluetooth speak will now appear on your phone. You will see “Paired” and “Connected” on your speaker phone’s screen.
   **NOTE:** If the battery of your Bluetooth cell phone and/or speaker phone is weak, you may lose the Bluetooth connection. Be sure to maintain the charge of BOTH batteries to ensure good Bluetooth connectivity.

Please note: The Bluetooth speaker phone buttons might not operate according to the instructions in this User Guide if your cell phone has an unusual wireless interface. In that case, please reset both the Bluetooth speaker phone and cell phone. Your Bluetooth speaker phone is compliant with and adapts to the Bluetooth enabled profile.

**Downloading your Bluetooth Cell Phone’s Address Book**

To view caller name on the Bluetooth speaker phone you need to download your phone’s address book into the unit. Please pair your cell phone with the Bluetooth speaker phone before uploading.

1. Navigate to your cell phone contacts, then touch “Manage Contacts” to send a number to another device.
2. Select “Add Contact” to send the number to the Bluetooth speaker phone.
3. Select “Add Number” from Bluetooth speaker phone’s address book.
   **NOTE:** Bluetooth speaker phone will show “Add Number” when the number is not sent to your phone.

**Calling**

1. When a call is active and a second call is coming through, a call alert will be heard from the Bluetooth speaker phone within a few seconds. (The call alert will be heard from the Bluetooth speaker phone immediately for the next call coming through.)

2. Press and hold the Multi-Function Button for a second. The screen will show the second call number or name of the incoming call.

3. The first call will be placed on hold, and you can talk to the second caller.

4. To end this call, press the Multi-Function button to disconnect.

**Last Number Redial**

To redial the last caller, press the Multi-Function button twice quickly. The screen shows “Redial.” Press “” and “” to access recently called numbers and use “” and “” to select the number. Press Multi-Function button to dial the number.

**Volume Control**

1. When you are on your call, press the “” button to turn up the sound; press the “” button to turn down the sound.
2. Adjust the volume of the Bluetooth speaker phone also can adjust the volume of the speaker phone.

**Call Switching between Bluetooth and Speaker Phone**

1. While paired with your Bluetooth speaker phone, you can also use your Bluetooth cell phone to make and receive the call.
2. To switch calls between your Bluetooth speaker phone and the cell phone, press the multi-function button about 3 seconds until screen shows “Transfer.”

**Adding and Deleting Callers’ Phone Numbers**

Note: some cell phones do not support the upload of individual phone numbers.

1. Navigate to your cell phone contacts, then touch “Manage Contacts” to send a number to another device.
2. To execute your cell phone contacts, then touch “Manage Contacts” to send a number to another device.
3. Select “Add Contact” to send the number to the Bluetooth speaker phone.

**Deleting Numbers**

1. Delete All Numbers: From your Bluetooth speaker phone’s address book, press the Multi-Function button for eight seconds you can delete all numbers you have saved. It will display “Delete All.”
2. Delete individual selected numbers: When you want to delete a specific number, you can access “Recent called mode” or “phone book” to find the number you want to delete and press “” and “” buttons at the same time. The number will be deleted.

**Care & Maintenance**

1. Do not put your Bluetooth speaker phone over in salt, rain or change the Bluetooth speaker phone battery while the battery is low. Do not use your Bluetooth speaker phone with the battery very low or while it is charging. Recharge your Bluetooth speaker phone as soon as possible.

2. Do not expose your speaker phone to liquid, moisture or excessive humidity, as it is not waterproof.

3. Do not use abrasive cleaners or solvents to clean the device.

5. Do not expose the speaker phone to temperatures below 14 °F (-10 °C) or above 140 °F (60 °C). When you park your car in conditions outside these temperature ranges, remove your Bluetooth speaker phone and take it inside.

6. Do not park the speaker phone, its battery pack, in fire as it will result in an explosion. Do not disassemble the device, as it does not contain serviceable components.

7. If you will not use the Bluetooth speaker phone for a long period, store it in a cool, place, free from extreme temperatures and dust or dirt.

**Additional Safety Information:**

1. Check local hands free laws on using cell phone and Bluetooth speaker phone while driving.

2. If you use Bluetooth speaker phone while driving, please keep your hands on the wheel and your eyes on the road.

3. The Bluetooth speaker phone is not a toy. Please keep children away from it.

4. Do not use the device that require an electronic advice or RF Radio to be switched OFF in designated areas. These could indicate hospital, boarding area or potential explosive environments.

**Troubleshooting**

If you are unable to connect your Bluetooth speaker phone to the cell phone, please check and try the following:

1. Ensure the Bluetooth speaker phone is switched ON.
2. Ensure both your Bluetooth speaker phone and the cell phone have enough battery power to pair successfully.
3. Ensure your Bluetooth speaker phone is paired with your cell phone (please refer to your cell phone user guide for specific instructions for pairing).
4. Ensure the device is within 30 feet of the mobile phone and there are no obstructions, such as walls or other electronic devices.

**Pairing operations fail:**

1. Delete the model number from the paired list on your cell phone.
2. Replace the Bluetooth and the Bluetooth speaker phone device by powering them off and back on.
3. Re-pair the two devices. Turn off the cell phone and separate the battery from it for approximately 5 seconds. Repeat the pairing process.

**Note:** In some instances, this action clears up any potential bugs built up in the cell phone software that can hinder proper pairing. If you have connected the Bluetooth speaker phone to your cell phone before but there is no Bluetooth device found, and check the radio signal strength indicator on your mobile phone, as your Bluetooth speaker phone. Your current location may not provide good call quality. Move to a location where the radio signal strength is greater and there is less interference.

**Also:** Magnetized objects placed near the Bluetooth speaker phone or your mobile phone may terminate the call. Keep the devices away from such objects.

**If the Caller ID does not show properly:**

The Bluetooth speaker phone supports up to 12 digit caller ID. For longer phone numbers, such as certain international calls, the caller ID will show only the latter part of the numbers. Some telecom service providers may not support Caller ID, and their users’ phone numbers will not appear on your speaker phone’s screen.
