These instructions relate ONLY to the Solar Gazing Ball and contain important information for using the product for the first time. Please keep these instructions for later reference. They should always accompany the product in the event of transfer to a new user.

1. INTRODUCTION

Thank you for purchasing the Solar Gazing Ball. You have purchased a product that complies with the latest and most advanced and up-to-date solar technology available. This product complies with European and National Standards. The relevant certificates of conformity are held by Smart Solar. To preserve these standards and in order to maintain safety you should adhere to the instructions for use detailed in this manual.

2. SECURITY INSTRUCTIONS

In the event of any problems arising or damage occurring as a result of misuse the manufacturers warranty will be deemed cancelled. The manufacturer is not responsible for any claims or damages arising from the misuse of this product. For safety reasons and in order to maintain standards (CE) you are prohibited from altering or changing any component in the Solar Gazing Ball. Please follow the instructions very carefully. For commercial applications due care and attention must be paid to the Health and Safety Standards in your jurisdiction.

Instruction Manual

Model 3560MRM1

3. OVERVIEW

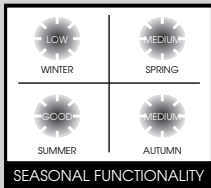

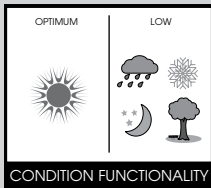

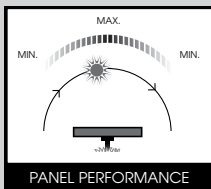

The Chameleon™ solar gazing ball is a lighted solar garden accent. The pedestal is made from a fiberglass/resin composite. The gazing ball itself is made from a special crackled glass, is illuminated by LEDs, and the panel absorbs sunlight and converts it to usable energy that is stored in the rechargeable Ni-Mh batteries found on the inside of the gazing ball. The illumination comes from multi-color & white LED. The unit will automatically go on in the evening and go off at daylight or when the battery pack is exhausted.

In order for your unit to operate at maximum efficiency it is important to place it in direct sunlight. The performance of your unit will depend on the charging of the batteries by the solar panel and will be affected by location and the season position of the sun.

4. COMPONENTS

- 1 Glass Gazing Ball.
- 2 Solar Gazing Ball Pedestal Stand.

5. ASSEMBLING & USING YOUR PRODUCT

1. Carefully unpack the product from the box paying special attention not to drop the glass gazing ball on any hard surface since it will break if dropped.
2. Turn pedestal right side up and place in desired location.
3. Select either color mode or white mode on the bottom of the gazing ball. (See Figure 1)
4. Screw Gazing Ball into pedestal. (See Figure 2)
5. For optimal results allow the gazing ball to fully charge for one day in the off position and then slide the on/off switch on the bottom of gazing ball to activate.

6. CLEANING AND MAINTENANCE

The glass gazing ball should be cleaned with a soft cloth and water or a mild glass cleaning solution.

Changing of the batteries:

This product is powered by 2 AAA Ni-Mh 600 mAh rechargeable batteries. Under normal use, the batteries should last approximately 2 years. It is time to replace the batteries when the gazing globe operates for only a few hours or becomes dim despite a full day of charging in bright sun.

To replace the batteries simply remove the screws from the underside of the gazing ball. Carefully remove the cover (See Figure 3). Remove the old batteries and replace with new AAA Ni-Mh 600 mAh batteries. Pay attention to orient the batteries with the "+" and "-" poles in the correct position (See Figure 4). Replace the top cover by re-fastening all the screws.

Please note: Used batteries must be disposed of carefully with regard to the environment and should not be put into the family waste. Please follow your local disposal laws accordingly.

FIGURE 3

FIGURE 4

7. TROUBLESHOOTING

If the light does not come on in the evening, please verify the following:

- 1) The switch on the underside of the gazing ball is in the "on" position
- 2) The sensor is not being illuminated by another light source simulating daylight and preventing the light from coming on

8. WARNINGS

1. Do not disassemble the unit except for the battery cover
2. Keep the product away from fire
3. Do not hit the product with hard objects
4. Do not drop the glass gazing ball in any hard surface – it will shatter
5. Use only water or a mild glass cleaning solution to clean the glass gazing ball – do not use harsh chemicals
6. This product is not a toy – please use only as a garden decoration
7. If you live in an area with frequent below freezing temperatures, you should store this product in a dry location for the winter. If these steps are not followed, the glass may crack due to condensation and freezing temperatures.

9. TECHNICAL DATA

Operation Voltage:	2.4 V
Solar Module:	4.0 V / 0.4 W
Light Source:	2 White & 1 RGB LED
Battery:	2 x AAA Ni-Mh 600mAh
Operating Time:	Up to 8 hours on a full charge

10. SPARE PARTS

Batteries: AAA Ni-Mh 600mAh x2

11. ONE YEAR WARRANTY

If at any time within 12 months from the date of purchase this product fails due to a defect in materials or workmanship, Smart Solar will replace or repair it free of charge. Please be sure to register your product within 7 days of purchase at www.smartsolar.com/customer-service/warranty-registration.

The warranty does not apply to:

Damage caused by accidents, abuse, poor handling, frost or normal wear and tear. Products which have been subject to unauthorized repair or modification.

For further information please contact your nearest service center detailed on the last page of this instruction manual.
