Professional Electrostatic Air Purifier
with Permanent Stainless Steel Filter
Model: 203833-01 and 203833-02

USE AND CARE GUIDE
Thank you for purchasing the Sharper Image® Ionic Comfort Electrostatic Air Purifier. We are dedicated to making your life cleaner and healthier with creative solutions that combine superior quality with the very latest technology.

The Sharper Image® Ionic Comfort provides fresher, cleaner air for you to breathe and saves you money at the same time by eliminating the need for expensive replacement filters. With a revolutionary quiet fan system, advanced ionic cleaning and patented high efficiency filter design, your Sharper Image® Ionic Comfort helps remove common pollutants such as dust, pollen and tobacco smoke from your air, along with smaller, more dangerous atomic sized particles that traditional HEPA air purifiers can leave behind. And, because it's whisper quiet, the Sharper Image® Ionic Comfort can be placed in any room in the house – even your bedroom.

Your Sharper Image® Ionic Comfort has been thoroughly tested to meet our own exacting quality control standards. Please take a few moments to review the following important information before using it.
SAVE THESE INSTRUCTIONS

**WARNING**

FAILURE TO FOLLOW THE PREVIOUS WARNINGS MAY RESULT IN ELECTRICAL SHOCK, FIRE, INJURY OR DEATH.

**GENERAL SAFETY INFORMATION**

The power cord is equipped with a three-prong grounded plug that must be inserted into a matching receptacle. Under no circumstances must the grounding prong be removed from the plug. A product with a grounding plug is meant to be connected to a grounded electrical system, one that contains a grounding conductor and a grounding plug. If you do not have a grounded system, you should have a qualified electrician install one.

- **1.** Make certain the power source conforms to the electrical requirements of the Product.

- **2.** Make certain that the room is equipped with a working smoke detector.

- **3.** Use this Product only as described in this manual. Any other use not recommended by the manufacturer may result in injury to persons or damage to property.

- **4.** To reduce the risk of personal injury and electric shock, the Product should not be played with or placed where small children can reach it.

- **5.** Unplug power cord before moving the Product.

- **6.** DO NOT use Product in or near a window. Rain may create an electrical hazard.

- **7.** Completely assemble Product according to instructions before connecting to power supply.

- **8.** Avoid the use of extension cords because the extension cord may overheat and cause a fire. Do not plug Product into any other cord connected device, such as a power strip, cord reel, surge protector, multiple-outlet adapters or outlet-type air fresheners. The use of such devices may create a fire hazard.

- **9.** NEVER operate any Product with a damaged cord or plug, or if the Product has been dropped or damaged in any manner.

- **10.** NEVER insert or allow fingers or foreign objects to enter any ventilation or exhaust opening as it may cause an electric shock, fire, or damage the Product. To reduce the risk of fire, DO NOT block or tamper with the Product in any manner while it is in operation.

- **11.** Always place the Product on a stable, flat, level surface when operating to avoid the chance of the Product overturning. It is recommended for floor use only. Locate the Power Cord so the Product or other objects are not resting on it. Do not run cord under carpeting. Do not cover cord with throw rugs, runners, or similar coverings. Do not route cord under furniture or appliances. Arrange cord away from traffic areas where it will not be tripped over.

- **12.** This Product is not intended for use in wet or damp locations. NEVER locate a Product where it may fall into a bathtub or other water container. NEVER use Product where flammable liquids are used or stored.

- **13.** Care should be taken so that objects do not fall into the unit or are spilled into the enclosures.

- **14.** NEVER use Product outdoors.

- **15.** This Product is not suitable for use in agricultural facilities including areas where livestock, poultry or other animals are confined. Please refer to National Electric Code (NEC) Article 547-7 (2008), or applicable state or local codes or standards relating to electrical requirements for Hazardous Locations. THIS PRODUCT DOES NOT MEET THE REQUIREMENTS OF NEC ARTICLE 547-7 (2008).

- **16.** This Product is not suitable for use in hazardous locations. Please refer to National Electric Code (NEC) Article 500 or applicable state or local codes or standards relating to electrical requirements for Hazardous Locations. THIS PRODUCT DOES NOT MEET THE REQUIREMENTS OF NEC ARTICLE 500 (2008).

- **17.** REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK - DO NOT USE THIS PRODUCT WITH ANY SOLID STATE SPEED CONTROL DEVICES.
Features and Controls
Main Unit

- Power Button
- Variable Speed Control
- Filter Door
- Permanent Stainless Steel Filter Assembly
- Honeycomb Pre-Filter
- Air in (Dirty)
- Air out (Clean)
- Permanent Stainless Steel Filter
- Honeycomb Pre-Filter
- Check Filter Light

Permanent Stainless Steel Filter Assembly

- Honeycomb Pre-Filter Pull to Remove
- Filter Removal
- Ionizer Wire Detail
- Ionizer Wire
Setting Up the Unit
1. Remove unit from carton.
2. Remove all packaging and tape from unit.

IMPORTANT:
• Remove and discard the foam packing block from inside the filter door. The unit must be placed on a level surface, and there must be a minimum 24” (60cm) clearance from anything around the unit. Ensure that the air intake grill and air exit grill are not blocked.

Operating the Unit
1. Plug the power cord into an energized electrical wall outlet.
2. The power button will illuminate when it is pressed to turn the unit on.
3. Select the desired speed by rotating the variable speed control.
4. Press the Power Button again to shut the unit off.

Filter Cleaning Reminder
• The Check Filter LED Light illuminates to alert you when the Stainless Steel Filter needs to be checked for cleaning.
• The light is programmed to illuminate after set intervals of time.
• Depending on the air quality in your environment, it may be necessary to clean your filter more or less frequently than the Check Filter Light indicates. Constant Arcing is the best indication that the filter is in need of cleaning.

To extinguish the light:
1. Press the Power Button once so the unit shuts off.
2. Next, hold down the Power Button for 5 seconds. You will see the Check Filter Light flash for 3 seconds. Your timer has now reset.

Stainless Steel Filter Maintenance

CAUTION
• Caution must be used when handling or cleaning the stainless steel filter as the ionizer wire may break with excessive applied pressure.
• Inserting a wet filter into the unit may permanently damage the electrical components!
• The air quality will affect how frequently the filter must be cleaned. The stainless steel filter may be machine washed in a dishwasher or manually in a sink or tub.

Stainless Steel Filter Assembly cleaning procedure:
1. Press the Power Button to shut the unit off.
2. Unplug the unit from the receptacle outlet.
3. Open the Filter Door and remove the Stainless Steel Filter Assembly by firmly gripping the Filter Handle and pulling the assembly out of the unit.
4. Remove Honeycomb Pre-Filter from Stainless Steel Filter Assembly prior to cleaning.

Dishwasher Cleaning
Remove the Honeycomb Pre-Filter from the bottom of the Stainless Steel Filter Assembly and place both components on the bottom tray of your dishwasher. Wash the filters as you would dishes. If you find that the filter’s Stainless Steel Filter Plates do not get completely clean with one wash cycle, increase the wash cycle time or wash the Filters a second time. Note that some phosphate-free dishwasher detergents can cause staining to the aluminum filter-frame. Staining will not affect performance. If in doubt, use water-only cleaning or clean in sink. The normal dishwasher drying cycle should be an effective drying time.

Note:
Do not allow the dishwasher rack to bend the Stainless Steel Filter Plates or break the Ionizer Wire. Care must be taken when positioning in the dishwasher. Your air purifier will not function properly if the Stainless Steel Plates touch each other or the Ionizer Wire breaks.

**Troubleshooting Guide**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Resolution</th>
</tr>
</thead>
</table>
| Crackling sound is heard:                              | 1. The Filter Assembly needs to be cleaned. Refer to the section on Stainless Steel Filter Maintenance.  
2. Filters are not completely dry after cleaning. Remove the filters from the unit and let them completely dry until the crackling stops.  
3. Foreign material is caught between the Stainless Steel Filter Plates. Turn off and unplug the unit then carefully remove debris making sure not to bend the plates. |
| A “Hissing” sound is heard or; Cleaning Performance seems low: | 1. After prolonged use, the unit’s Ionizer Wire may become dirty. This may result in poor ion generation and the possibility of a “Hissing” sound coming from the unit’s Ionizer Wire. If this occurs, wash the Filter Assembly as described in the section on Stainless Steel Filter Maintenance. |
| Unit will not Turn On:                                 | 1. Ensure that the Filter Assembly is properly inserted and the unit is properly plugged into an energized wall outlet. |
| Ionizer Wire is broken:                                | 1. Call Customer Service for a replacement. The unit will not operate with a broken Ionizer Wire. Never replace this wire with anything but approved components supplied by the manufacturer. |

**Questions and Answers**

<table>
<thead>
<tr>
<th>Questions</th>
<th>Answer</th>
</tr>
</thead>
</table>
| How often is cleaning of the Stainless Steel Filter Assembly required?    | The Check Filter LED Indicator illuminates to alert you when the Stainless Steel Filter Assembly needs to be checked for cleaning.  
It may be necessary to clean the Filter Assembly more frequently depending on the air quality in your environment. |
| Can I leave my Sharper Image® Ionic Comfort on continuously?              | Yes. It is safe and economical to leave on as long as you like - even 24 hours per day, 365 days per year. |
| Will my Sharper Image® Ionic Comfort interfere with home or office equipment (e.g. computers)? | No. The Sharper Image® Ionic Comfort meets FCC regulations for harmful interference with radio communications so you may place your Sharper Image® Ionic Comfort by your computer, audio players, etc. without causing any unusual interference problems. |
| Will the Stainless Steel Filter wear out over time?                       | No. The Stainless Steel Filter Assembly is made of high quality corrosion resistant stainless steel. Be careful not to bend the plates. If the plates touch each other, the electrostatic filtration will be impaired. Note that some phosphate-free dishwasher detergents can react with aluminum and cause staining. It’s recommended to try water-only cleaning first if washing filter in dishwasher. |

5. Allow the Stainless Steel Filter and Honeycomb Pre-Filter to dry completely before inserting them back into the unit. The filter can be dried in the dishwasher or air-dried. Typically, evaporative air drying can take 12-24 hours, depending on humidity and temperature.

6. Install the Honeycomb Pre-Filter back into the bottom of the Stainless Steel Filter Assembly. Don’t worry: both ends are the same, so it can be inserted either way. Never operate the unit without the Honeycomb Pre-Filter.

7. Insert the cleaned and dried Stainless Steel Filter Assembly back into your Sharper Image® Ionic Comfort unit. If you have reinstalled the Stainless Steel Filter Assembly after cleaning and drying, and hear “crackling” after turning it on, your filter is still wet. Turn the unit off, remove the Filter Assembly and allow it to dry longer.

Sink Cleaning
Remove the Honeycomb Pre-Filter from the Stainless Steel Filter Assembly and place both components in your sink. Rinse to remove large debris. Submerge both filters in warm water that contains standard dish washing soap. Allow the filters to soak for at least 15 minutes, drain the sink and rinse the filters with cold water.
