Dear Valued Customer,

Congratulations on your Fat Freezer purchase. We are certain that it will become an essential part of your toning routine. The Fat Freezer speeds up the natural elimination of fat cells and is a machine, intended for use by adults, desiring to decrease subcutaneous fat deposits in specific areas of the body.

Warning:

Don’t be alarmed if during use, the Fat Freezer machine may heat up as this is a normal process to allow the machine to ventilate after extended use.

Thank you

Proper use guidelines:

1. Warnings:
   - It is unsafe to use the FatFreezer, its accessories, detachable parts and materials in ways not described in the instructions for use.
   - Before use:
     - Make sure that the FatFreezer works correctly by turning on the machine briefly before using it.
     - Make sure that all accessory parts are properly attached.
     - Check and maintain the cleanliness of the parts in direct contact with your skin via the protective membrane.
     - Avoid placing the device near high frequency equipment.
   - During Use:
     - Do not position the FatFreezer so that it is difficult to disconnect the power cord of the adapter. Maintain the proper positioning of the FatFreezer with the CONTROL PANEL face upwards. This will allow quick access to the OFF button and quick access to removing the DC plug from the device.
   - After use:
     - Let the FatFreezer set for 10 minutes after turning it off and disconnecting it. This allows time for the metal plate to return to normal (room) temperature.
     - Clean the FatFreezer by wiping it over with a soft cloth. You may use an organic solvent (for example: antiseptic solution, etc.) to clean the device.

WARNING Do not clean or maintain the FatFreezer while the equipment is in use.

2. Do not use the FatFreezer in the presence of high frequency equipment.

3. Operating instructions:
   - Pressing this button turns off the FatFreezer. Press this button when you want to interrupt timed operation (30 or 60 minutes to treat fat cells in that area.)
   - A green light turns on after pressing the ‘30’ or ‘60’ button to confirm that the FatFreezer machine is working properly.
   - A green light turns on after pressing the ‘30’ or ‘60’ button to confirm that the FatFreezer machine is working properly.

4. Recommended diet plan
   - 5. Fat measuring device

Setup instructions:

1. Loop one end of the Velcro belt around the handle of one end of the FatFreezer machine.
2. Apply a protective pad on the desired area of your body.
3. Carefully place the FatFreezer machine (metal plate) over the protective membrane.
4. Wrap the Velcro belt firmly around the body part and apply the other end around the opposite loop attach the FatFreezer firmly.

WARNING: To avoid strangulation caused by cutting off impeding your blood circulation, DO NOT tighten the FatFreezer excessively tight around your body part. The Velcro belt is used to hold the FatFreezer firmly to avoid slipping, and NOT to obstruct blood circulation.

WARNING: If you feel numbness on the body part where the FatFreezer immediately detached the device from your body.

Features:

- The FatFreezer uses scientifically proven cold lipolysis technology that works by delivering energy (cold) through an area of the skin that helps dissolve the fat cell deposits beneath that area by freezing them away.
- FatFreezer provides a non-invasive safe and simple way of reducing pockets of fatty tissue in designated areas of the body.

Important safety instructions:

WARNING: No modification of the equipment is allowed.

FatFreezer is powered through a power adapter which converts AC power from a wall outlet to the DC power required by the FatFreezer.

Your FatFreezer comes with a universal AC-DC adapter. That means that you may connect the power cord to any 100V-200V as well as 220-240V outlets without switching settings or using power converters.

Defective FatFreezer:

Stop using the device immediately if the device does not work properly. Please attach a note with the following: “Do not use this FatFreezer to prevent any further use. This defective device should be stored in a safe place until it has been returned for replacement.

Environment conditions:

Transport & storage:

Ambient temperature: 20°C to 60°C (-4°F to 140°F)

Relative humidity: 5% to 85%

Atmospheric pressure: 700Pa to 1060Hpa

Normal use:

Ambient temperature: 20°C to 25°C (68°F to 77°F)

Relative humidity: 30% to 85%

Atmospheric pressure: 700Pa to 1060Hpa

Electrical caution:

DO NOT connect the AC power cord to an AC outlet before connecting the DC plug to the FatFreezer because doing this may damage the AC-DC adapter.

IMPORTANT: Damage may occur if you use a different adapter to power the FatFreezer or if you use FatFreezer adapter to power other electrical devices. If there is smoke, burning scent, or extreme heat coming from the AC-DC adapter. You may damage your FatFreezer with a faulty AC-DC adapter.

WARNING: This power adapter may become warm to hot when in use. Be sure not to cover the adapter, and to keep it away from your body.

IMPORTANT: Unplug the power adapter or switch off the AC outlet to minimize the power consumption when the FatFreezer is not in use.

Health warnings:

1. WARNING: Do not use this product if you are pregnant, a child under the age of 18 years of age, incapacitated or immobilized person or anyone who cannot clearly understand the instructions and/or operate the controls.

2. IMPORTANT! Do not use the product if you have any heart-related illnesses, suffer from epilepsy, fever, inflammation, dermatitis (acne, eczema, herpes), warts open or recently stitched wounds, serious or progressive illnesses (cancer, AIDS, hepatitis, blood disorders, etc.), blood circulation problems or mental. Stress.

3. IMPORTANT: Do not use the FatFreezer on your head, eye, neck (throat), breasts, genital area, and inside your mouth.

4. IMPORTANT: Do not use the FatFreezer without protective pads.

Possible side effects:

Temporary side effects include bruising, numbness, redness and irritation of the skin where the FatFreezer has been placed. These side effects are rare and only temporary.

If skin irritation occurs after treatment, please discontinue use immediately. If symptoms persist contact a physician.

WARNING:

If you feel that the FatFreezer is in use, DO NOT attempt to open the device, as this may damage the delicate electrical components in the device.

You may use a dual-removal blender to clean the fan area of dust accumulation.

Repair:

If your FatFreezer malfunctions during the warranty, DO NOT attempt to open the device, as this may damage the delicate electrical components in the device.

Disposable parts:

The protective membranes are the only disposable accessories used with the FatFreezer. Protective membranes should be discarded after use. The protective membranes can be discarded in your household recyclable waste containers in the same manner you would discard normal waste.

Replaceable parts:

There are no replaceable parts that require installation by the consumer to repair the FatFreezer. The manufacturer will replace a machine that has been assessed as defective.

Storage precautions:

WARNING: Do not leave the device where it could be influenced by vibration or shock.

WARNING: Do not leave the device in a dusty, salty or sulfurous environment. These elements can negatively affect the performance of FatFreezer and decrease service expectancy.

Use a soft cloth to wipe down the FatFreezer after each use. The entire device can be cleaned.

To avoid strangle caused by cutting off impeding your blood circulation, DO NOT tighten the FatFreezer excessively tight around your body part.

It is unsafe to use the FatFreezer, its accessories, detachable parts and materials in ways not described in the instructions for use.
