HOW TO USE
1. Before using, make sure the unit is placed on a stable surface. Use the same power supply and voltage as mentioned on the rating label on the back side of the product. Once the product is plugged in, the buzzer will beep once then the LED display will illuminate a few seconds later. The unit will enter standby mode once the power indicator lights up.

2. **Switch on:** When the unit is stationary, press the “On/Off” button, the buzzer will beep twice. Choose your preferred fan speed by pressing the “speed” button on the control panel or on the remote controller.

3. **Wind speed adjustment:** Choose from Low, Medium and High. The relative wind circulation can be set from the control operation on the panel.
HOW TO USE [CONT’D]

4. **Swing mode adjustment**: Press the “Swing” button on the control panel or remote controller, it will start the auto swing function. The unit will move from left to right to circulate air. Press the “Swing” button again to turn it off.

5. **Oscillation mode adjustment**: Press the “Oscillation” button on the control panel or remote controller, it will start the auto oscillation function. The unit’s front rotary will move in a circular motion. Press the “Oscillation” button again to turn it off.

6. **Ionizer function**: Lightly press the “Ion” button to switch on the function. Press the button again to switch off the function.

7. **Humidifier/ Misting function**: Press the “Mist” button on the control panel or on remote controller. The display screen will show the humidification pattern. The green light indicates normal humidifier function and the red light indicates when the water tank needs to be refilled. Press the button again to turn off the mist function.

8. **Ultrasonic Mosquito Repellent function**: Press the “Mosquito” button. The display screen will show the logo to indicate that the Mosquito function is on. Press the button again to switch off the function. This function works independently in fan mode or in standby mode. **Optional: Insert a mosquito repellent tablet [not included] into the Mosquito Repellent Slot at the back of the unit.**

9. **Timer function**: Press the “Timer” button on the control panel or remote controller to set the time. Each time you press the timer button the display screen will show the input time you set. The timer can be set 0.5 hour to 9.5 hours with intervals of 1 hour each. [0.5, 1, 1.5 hours up to 9.5 hours]. Press the ‘Timer” button once again to turn off the timer function.

10. **Remote controller function**: The remote controller operates the MIST, SWING, TIMER, SPEED and ON/OFF functions of the unit. It works with 2 X AAA batteries [not included].

OPERATION METHODS FOR WATER TANK

1. Detach the water tank at a 45° angle.
2. Unscrew the tank cover and fill the tank with water.
3. Place the water tank back into the unit at a 45 °angle.
4. You will hear a “click” sound when positioned and secure. **NOTE: Please make sure the water tank and unit are fastened to avoid any damage while transporting.**

CAUTIONS

1. Unplug the unit before refilling with water and cleaning.
2. This unit is not intended for use by children or people with reduce physical, sensory or mental capabilities, or lack of experience and knowledge.
3. If the supply cord is damaged contact Sharper Image Customer Service team.
MAINTENANCE AND CLEANING

1. Turn the unit off and unplug before cleaning.
2. Do not immerse the plug or unit into any liquid.
3. Use a wet towel soaked with water and mild detergent to clean the body of the unit.
   Do not scratch the unit during cleaning.
4. Optional: add a few drops of mild citric acid and water into the water tank for 5-10 minutes to remove any dirt in the water tank.
5. If the unit will not be used for a long period of time, empty the water tank and let it dry before storing.
