**PC & MAC CONNECTION:**

**HOW TO CONNECT THE 12X ZOOM DIGITAL CAMERA BINOCULARS TO YOUR COMPUTER**
- Connect the USB to the camera while the device is turned OFF. The camera will appear as a new video source.
- This option only works with the following operating systems: Windows 2000/XP/Vista/Windows 7, MAC OS X 10.3.6 and above.

**WARRANTY & CUSTOMER SERVICE**

**SHARPER IMAGE**

SHARPER IMAGE® name and logo are registered trademarks. ©SHARPER IMAGE. All Rights Reserved.

**Introduction:**

The SHARPER IMAGE® 12X Zoom Digital Camera Binoculars combine an all-optical binocular system with a high-definition digital video camera. The LCD display on this camera allows you to view your subject on the device, in addition to taking still photos and recording videos.

**How to Use:**

**Eye Distance Adjustment**
- Set the binoculars to your normal observational position and rotate the two lens cones (A) and (B) inward or outward until you see a single circle through the lenses.

**Focus:**
- Close your right eye and observe with your left eye. Rotate the central focusing knob (A) until the image is clear.
- Next, close your left eye and observe with your right eye. Rotate the central focusing knob (B) until the image is clear.

**Cleaning & Maintenance**
- To remove dust from the lenses, use a soft microfiber cloth.
- Only use liquid cleaning products recommended for prescription lenses.
- Do not attempt to disassemble the inside of the device.
- Keep your binoculars in a dry, ventilated place when not in use.
- Storing the unit may cause damage to your eyes.

**Battery:**
- This item has a built-in rechargeable Lithium battery that automatically charges the camera every time you connect it to a computer via USB cable.
- When the battery is low, the LCD displays “Battery Low.” If the rechargeable battery is not recharged, the indicator light will turn off.

**Installing Micro-SD Card:**
- The power indicator (D) will blink quickly when inserting the Micro-SD card. Insert the Micro-SD card (E) into the correct slot (F) with the printed side facing down and the gold contacts facing up. Insert the card until you hear a click.

To remove the Micro-SD card, you must turn the camera OFF. Once it is OFF, simply push the card inwards to disengage the locking mechanism. The card will pop out.

It is recommended that you use Class 4 or allow SD cards with a minimum of 16 MB of storage. Use speed cards do not support Class 2 memory. In this case, you could result in lower quality video.

To safely use your Micro-SD card, do not remove or turn off the power of the device when the card is being read. Always remove your Micro-SD card before using.

**Camera:**

**Mode Options:**
- With the camera turned ON, press the Mode button to select the mode you want to use. Press Photo Mode, Replay Mode or Video Mode.

**Photo Mode:**
- The camera automatically stores images and videos.
- To remove the Micro-SD card, you must turn the camera OFF. Once it is OFF, simply press the Menu button twice to access System Settings.
- Press the Snap/Ok button to confirm.

**Video Mode:**
- Press the Mode button to switch to video mode, then press the Snap/Ok button to start recording videos.

**Replay Mode:**
- Press the Mode button to switch to replay mode, then press the Snap/Ok button to view recorded videos.

To use the digital zoom feature, press the Up and Down buttons when in Photo or Video Mode to focus on your digital zoom range. For best results, hold the binoculars lightly to avoid a jumpy movement and/or shaking.
